(Mechatronics technician; Thilo K. Mechatronics technician; Brandon S. Mechatronics technician; Maximilian B. Electronics technician and Pierre D. Electronics technician.

Venator apprentices celebrate success

Duisburg, Germany – Ten apprentices are celebrating after being offered jobs at Venator Germany GmbH in Duisburg. The appointments were announced as the apprentices completed work placements at the company and finished their vocational studies.

For the past three years, the apprentices have been working at Venator, developing their skills as chemical, electronics and mechatronic technicians, and learning about the world of pigments and additives. Thanks to their performance at vocational school and the quality of their practical work at Venator, all ten apprentices were eligible to sit their final vocational examinations half a year early - and all passed successfully, with two pupils achieving an overall Grade A.

All ten apprentices will now continue to work at Venator, the global expert pigment and additive company, which is based in Duisburg Homberg, and is a leader in the field of titanium dioxide, color pigments and functional additives.

Congratulating the apprentices, Site Director Michael Vössing from Venator, said: "Well done to all of our apprentices on their excellent performance both at Venator and at vocational school. We are proud of their achievements and delighted we could offer all of them more work. Investing in the next generation is something we take very seriously at Venator. Every year, we take on new apprentices, offering them internships aligned with their career aspirations. Currently we have 51 apprentices employed in five different occupations, with new opportunities arising every year."

In September 2018, another 18 apprentices will have the opportunity to start work at Venator's Duisburg site, the selection process has already begun, and applications can be submitted by emailing: ausbildung@venatorcorp.com. Interested school leavers can apply for apprenticeships as chemical technicians, chemical laboratory assistants, electronics

technicians and mechatronics technicians for the year 2019. To find out more, you can meet the Venator team on Saturday 22 September 2018, as the business will be holding a Open day at its Duisburg site.

ENDS

About Venator

Venator is a global manufacturer and marketer of chemical products that comprise a broad range of pigments and additives that bring color and vibrancy to buildings, protect and extend product life, and reduce energy consumption. We market our products globally to a diversified group of industrial customers through two segments: Titanium Dioxide, which consists of our TiO₂ business, and Performance Additives, which consists of our functional additives, color pigments, timber treatment and water treatment businesses. We operate 26 facilities, employ approximately 4,500 associates worldwide and sell our products in more than 110 countries.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements contained in this press release constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements represent Venator's expectations or beliefs concerning future events, and it is possible that the results described in this press release will not be achieved. These forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside of Venator's control, that could cause actual results to differ materially from the results discussed in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and, except as required by law, Venator does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. New factors emerge from time to time, and it is not possible for Venator to predict all such factors. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in the prospectus filed with the SEC in connection with Venator's initial public offering. The risk factors and other factors noted in Venator's prospectus could cause its actual results to differ materially from those contained in any forward-looking statement.
