Venator to catch up with cosmetics customers at NYSCC **Stand 1677, Javits Convention Center, New York City, 15-16 May 2018**

Wynyard, UK – The New York Society of Cosmetic Chemists (NYSCC) Suppliers' Day in New York City is the destination for Venator's cosmetics experts in May. At NYSCC, Venator will be promoting the wide range of high purity pigments, UV-filters and additives it makes for the personal care and beauty industry - including its latest specialty titanium dioxide innovation, HOMBITAN® AFDC 101.

HOMBITAN® AFDC 101 pigment is a pure, uncoated, anatase titanium dioxide grade that is made using a special process technology. This innovative manufacturing technique enables Venator to produce a pigment with crystal size distributions optimized to reflect selected wavelengths of light. The result is a product that combines the softness of an anatase titanium dioxide pigment with enhanced opacity properties, which can be used on its own or in combination with color pigments.

Venator - previously Huntsman Pigments and Additives – has one of the broadest portfolios of pigments and additives available to cosmetics and skin care formulators. Using its expertise, Venator has created a range of specialty titanium dioxide pigments that can help provide a flawless finish in foundations, concealers, correcting creams and countless other cosmetic products. Venator has a wealth of experience in the development of UV-filter products for anti-aging skin care treatments, baby care and sunscreen formulations. Venator also provides the pigment power behind countless color cosmetics – making color pigments that can deliver dramatic, long-lasting results in mascaras, eyeshadows, lipsticks, blushers and many other make up products.

Reiner Mertscheit, Global Business Director at Venator, said: "This is our first NYSCC Suppliers' Day since we became Venator, and we're looking forward to a busy show. Although we have a new name, NYSCC attendees will recognize our cosmetics experts and our well-known pigments and additives brands – including HOMBITAN® AFDC 101, which has proved popular with cosmetics formulators since its launch."

Say hello to Venator's cosmetics team at NYSCC and learn more about the company's portfolio of pigments and additives. Visit the team at Stand 1677. Alternatively, if you're not going to NYSCC, email: cosmetics_expert@venatorcorp.com.

About Venator

Venator is a global manufacturer and marketer of chemical products that comprise a broad range of pigments and additives that bring color and vibrancy to buildings, protect and extend product life, and reduce energy consumption. We market our products globally to a diversified group of industrial customers through two segments: Titanium Dioxide, which consists of our TiO₂ business, and Performance Additives, which consists of our functional additives, color pigments, timber treatment and water treatment businesses. We operate 26 facilities, employ approximately 4,500 associates worldwide and sell our products in more than 110 countries.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements contained in this press release constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements represent Venator's expectations or beliefs concerning future events, and it is possible that the results described in this press release will not be achieved. These forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside of Venator's control, that could cause actual results to differ materially from the results discussed in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and, except as required by law, Venator does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. New factors emerge from time to time, and it is not possible for Venator to predict all such factors. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in the prospectus filed with the SEC in connection with Venator's initial public offering. The risk factors and other factors noted in Venator's prospectus could cause its actual results to differ materially from those contained in any forward-looking statement.
