## Say hello to Venator at Food Ingredients Europe Visit Venator's experts at Food Ingredients Europe

**Stand number: 11.0.G20 at Frankfurt Messe, Germany - 28 to 30 November 2017**

Wynyard, UK – Next week, Venator Materials PLC (Venator), the experts in titanium dioxide (TiO<sub>2</sub>) and performance additives will be exhibiting at Food Ingredients Europe. At the event, Venator's specialists for the food and drink industry will be promoting HOMBITAN<sup>®</sup> titanium dioxide, a high purity, multi-purpose, white pigment made from naturally occurring minerals. This high performing pigment range is renowned for its ability to deliver exceptional whiteness, opacity and coverage. In addition, the team will be promoting an extensive range of color pigments designed to make edible items look as good as they taste.

*Reiner Mertscheit, Global Business Director at Venator, said: "We've been producing innovative, high purity titanium dioxide and color pigments for the global food and drink industry for many years. Our experience and expertise in this sector is world leading with our dedicated research and development and technical support teams working alongside our customers to provide solutions to their challenges. We are proud to offer products that are designed to meet the most stringent quality and compliance standards. Food Ingredients Europe is an excellent platform for us to talk about our newly introduced grade HOMBITAN<sup>®</sup> AFDC 101 pigment – a special grade of titanium dioxide with enhanced crystal size controlled technology. We look forward to talking to our customers about the benefits our products can bring."*

Alongside its range of HOMBITAN<sup>®</sup> titanium dioxide products, Venator produces other, well-known, high purity pigments and additives including FERROXIDE<sup>®</sup>, SICOVIT<sup>®</sup> and TRUPURE.

If you've got a new food or drink project that you are working on, or are seeking an innovative solution to an ingredient challenge, why not say hello to Venator's experts at Food Ingredients Europe. Alternatively, you can email the team at: [food\\_expert@venatorcorp.com](mailto:food_expert@venatorcorp.com)

**About Venator**

Venator is a global manufacturer and marketer of chemical products that comprise a broad range of pigments and additives that bring color and vibrancy to buildings, protect and extend product life, and reduce energy consumption. We market our products globally to a diversified group of industrial customers through two segments: Titanium Dioxide, which consists of our TiO<sub>2</sub> business, and Performance Additives, which consists of our functional additives, color pigments, timber treatment and water treatment businesses. We operate 27 facilities, employ approximately 4,500 associates worldwide and sell our products in more than 110 countries.

**Cautionary Statement Concerning Forward-Looking Statements**

Certain statements contained in this press release constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements represent Venator's expectations or beliefs concerning future events, and it is possible that the results described in this press release will not be achieved. These forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside of Venator's control, that could cause actual results to differ materially from the results discussed in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and, except as required by law, Venator does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. New factors emerge from time to time, and it is not possible for Venator to predict all such factors. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in the prospectus filed with the SEC in connection with Venator's initial public offering. The risk factors and other factors noted in Venator's prospectus could cause its actual results to differ materially from those contained in any forward-looking statement.
