Visit Venator at in-cosmetics global Stand L50, Paris, France - 2 to 4 April 2019

Wynyard, UK – Venator, the experts in titanium dioxide and color pigments for the cosmetics industry, will be exhibiting at in-cosmetics global in Paris this April. At this year's show, Venator will be promoting a range of products, which provide the power behind countless cosmetics, skin and dental care formulations.

Proven to provide the coverage, opacity, radiance, depth of color, staying power, stability and innovative properties needed to create stunning visual effects in many different formulations, Venator's products are trusted by many of the world's leading cosmetic houses, and skin and dental care brands.

For general cosmetic and personal care applications - including the formulation of soaps and shower gels - Venator offers a range of HOMBITAN® titanium dioxide pigments. Safe, compliant and miscible in water and oil, these pigments are available coated and uncoated, and offer excellent opacity and whitening capabilities. For example, in foundations they provide a flawless finish and in concealers and correcting creams they help deliver consistent coverage capabilities.

Reflecting the needs of sun and skin care formulators, Venator offers a range of UV-TITAN® ultrafine titanium dioxide UV-filters. These mineral-based products have exceptional UVA and UVB filtering capabilities, and excellent photo and chemical stability, enabling them to deliver brilliant protective properties in sun and daily-use skin care formulations.

In the field of color cosmetics, Venator's color pigments deliver dramatic, long-lasting results in products including mascaras, eyeshadows, lipsticks and blushers. Products include FERROXIDE®, SICOVIT® and ULTRAMARINE pigments - all of which are safe, compliant and provide brilliant batch-to-batch consistency.

Say hello to Venator's cosmetics experts at in-cosmetics global and learn more about the company's portfolio of pigments and UV-filters. Visit the team at stand L50. Alternatively, if you're not going to in-cosmetics global, you can email the team at: cosmetics_expert@venatorcorp.com.

About Venator

Venator is a global manufacturer and marketer of chemical products that comprise a broad range of pigments and additives that bring color and vibrancy to buildings, protect and extend product life, and reduce energy consumption. We market our products globally to a diversified group of industrial customers through two segments: Titanium Dioxide, which consists of our TiO₂ business, and Performance Additives, which consists of our functional additives, color pigments, timber treatment and water treatment businesses. We operate 25 facilities, employ approximately 4,500 associates worldwide and sell our products in more than 110 countries.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements contained in this press release constitute "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements represent Venator's expectations or beliefs concerning future events, and it is possible that the results described in this press release will not be achieved.

These forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside of Venator's control, that could cause actual results to differ materially from the results discussed in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and, except as required by law, Venator does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. New factors emerge from time to time, and it is not possible for Venator to predict all such factors. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in the prospectus filed with the SEC in connection with Venator's initial public offering. The risk factors and other factors noted in Venator's prospectus could cause its actual results to differ materially from those contained in any forward-looking statement.
