Say hello to Venator's cosmetic experts at PCHI China **Stand 6G15, Guangzhou, China - 26 to 28 February 2019**

Wynyard, UK – At this year's PCHI China in Guangzhou, Venator – the experts in titanium dioxide and color pigments for the cosmetics industry – will be promoting a range of products, which are trusted by many of the world's leading cosmetic houses, and skin and personal care brands.

Used in countless beauty and personal care formulations, Venator's titanium dioxide and color pigments are renowned for creating stunning visual effects and delivering brilliant protective properties.

For the manufacture of color cosmetics, where depth of color, staying power and stability are key, Venator offers a full spectrum of pigments, which can create dramatic, long-lasting results in products including mascaras, eyeshadows, lipsticks and blushers. Products under the spotlight at PCHI China will include FERROXIDE® and SICOVIT® iron oxide pigments and a range of ULTRAMARINE pigments - all of which are safe, compliant and provide brilliant batch-to-batch consistency.

When it comes to formulating foundations, concealers and correcting creams, Venator has developed a range of coated and uncoated HOMBITAN® titanium dioxide pigments, which provide the coverage, opacity and radiance needed for a consistently flawless finish. Safe, compliant and miscible in water and oil, these products can also be used in the formulation of soaps and shower gels.

Venator is also a key supplier to the sun protection market. The company's cosmetics team provides a range of mineral-based UV-TITAN® ultrafine titanium dioxide UV-filters that have exceptional UVA and UVB filtering capabilities, and excellent photo and chemical stability. These products are widely used in daily SPF formulations and in sun tan lotions, creams and sprays.

Reiner Mertscheit, Global Business Director at Venator, said: "PCHI is a great event for cosmetics and beauty formulators in Asia, who are looking to source high quality ingredients. From the brightest whites to jet blacks, and every color shade in between, our high purity products enable the creation of organic, inorganic and hypoallergenic skin care and cosmetic formulations that keep people looking and feeling their best, day and night."

Say hello to Venator's cosmetics experts at PCHI China and learn more about the company's full portfolio of pigments and UV-filters. Visit the team at Stand 6G15. Alternatively, if you're not going to PCHI China, you can email the team at: cosmetics_expert@venatorcorp.com.

About Venator

Venator is a global manufacturer and marketer of chemical products that comprise a broad range of pigments and additives that bring color and vibrancy to buildings, protect and extend product life, and reduce energy consumption. We market our products globally to a diversified group of industrial customers through two segments: Titanium Dioxide, which consists of our TiO₂ business, and Performance Additives, which consists of our functional additives, color pigments,

timber treatment and water treatment businesses. We operate 24 facilities, employ approximately 4,300 associates worldwide and sell our products in more than 110 countries.

Cautionary Statement Concerning Forward-Looking Statements

Certain statements contained in this press release constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements represent Venator’s expectations or beliefs concerning future events, and it is possible that the results described in this press release will not be achieved. These forward-looking statements are subject to risks, uncertainties and other factors, many of which are outside of Venator’s control, that could cause actual results to differ materially from the results discussed in the forward-looking statements.

Any forward-looking statement speaks only as of the date on which it is made, and, except as required by law, Venator does not undertake any obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. New factors emerge from time to time, and it is not possible for Venator to predict all such factors. When considering these forward-looking statements, you should keep in mind the risk factors and other cautionary statements in the prospectus filed with the SEC in connection with Venator’s initial public offering. The risk factors and other factors noted in Venator’s prospectus could cause its actual results to differ materially from those contained in any forward-looking statement.
